## Meyercord Tobacco Control Solution

# Collect, Enforce, and Protect Critical State Revenue

## The Current Challenge

Tobacco compliance representatives are required to license all entities in the value chain, monitor the distribution and sale of hundreds of thousands of tobacco products, collect millions in taxes per month, and support enforcement actions that protect additional millions in Master Settlement Agreement funds.

## From secure stamps to electronic reporting, Meyercord solutions make it easy.

-  Compliance is easy for good operators.
-  Reporting is easy for tax services.
-  Verifying compliance and identifying bad operators is easy for field inspectors and periodic audit officials.

## The Ideal Solution

States and local jurisdictions need modular, scalable solutions optimized for local tax rates and regulatory environments. These capabilities need to include:

### Licensing and reporting processes

scalable to agency or state needs, including a complete spectrum of training and information technology capabilities.

### Tax stamps on retail products

that provide easy authentication, with robust security features, secure distribution to the point of application, stamp activation on product marking, support for field enforcement teams, and compliance analytics.

### Enforcement activities

including report monitoring to make retail site inspection easier, compliance analytics to show trends, and physical forensics and digital records to support criminal prosecution.

## Our Proven Results

### Licensing and reporting

Tax filing management, compliance confirmation, audit flags identification, and audit/compliance activities that support “proof of diligent enforcement” requirements to protect Master Settlement agreement payments.

### Tax stamps

A range of secure tax stamps, licensed stamper management, stamp distribution, stamped product registration, and stamp inspections recording.

### Enforcement activities

Inspection tools, compliance analytics that prioritize inspection, work packages to support legal action, and forensics to support prosecution.

## Customers who have deployed our solutions save resources, time, and effort in:

- ✓ **Audit Support**  
Reporting and analytics make audits easier
- ✓ **Legal Fees**  
Forensic and expert testimony reduces fees
- ✓ **MSA Funding**  
Reports make proof of “diligent enforcement” easier
- ✓ **Track and Trace**  
Product lifecycle tracking makes counterfeit and other illicit activities more difficult
- ✓ **Critical Tax Revenue**  
Our complete solutions ensure critical tax revenue to fund vital state needs such as healthcare and education
- ✓ **State Resources**  
Deployed product suite frees up overburdened state resources and saves money
