Meyercord Tobacco Tax Revenue Compliance Management Solution

Comprehensive solution for licensing, revenue collection and compliance enforcement

The Current Challenge

State tobacco compliance professionals are tasked with protecting critical tobacco revenue. Compliance is achieved through the licensing, monitoring and distribution of tobacco products, tax collection, audit, inspections, and other compliance enforcement activities.

All with a shrinking workforce and budget constraints.

Meyercord make tax compliance requirements easy for states and licensees.

The Ideal Solution

Meyercord helps tobacco compliance professionals meet their challenges with the Tax Revenue Compliance Management System:

Licensing, electronic filing and reporting processes are scalable based on state needs and requirements.

Software Solutions maximize self-service capabilities to reduce administrative burden.

Collaborative Tools communicate with license holders and government stakeholders to easily maintain immutable records of licensees and state activity.

Tax services monitor e-filing, provide training and support for license holders, and identify non-compliant activity monthly.

An Audit and Enforcement Module monitors reports, inspects retail sites, provides compliance analytics, and supports criminal prosecution with physical forensics and digital records.

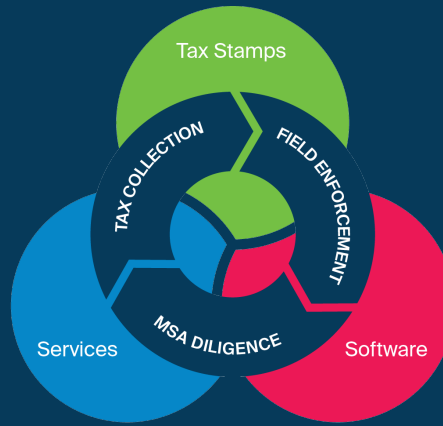

Our Proven Results

Efficient

- ✓ Easy compliance for filers
- ✓ Simple tools to identify discrepancies
- ✓ Minimum support functions required

Effective

- ✓ Collects required taxes
- ✓ Easy integration to other state IT systems
- ✓ Supports enforcement activities

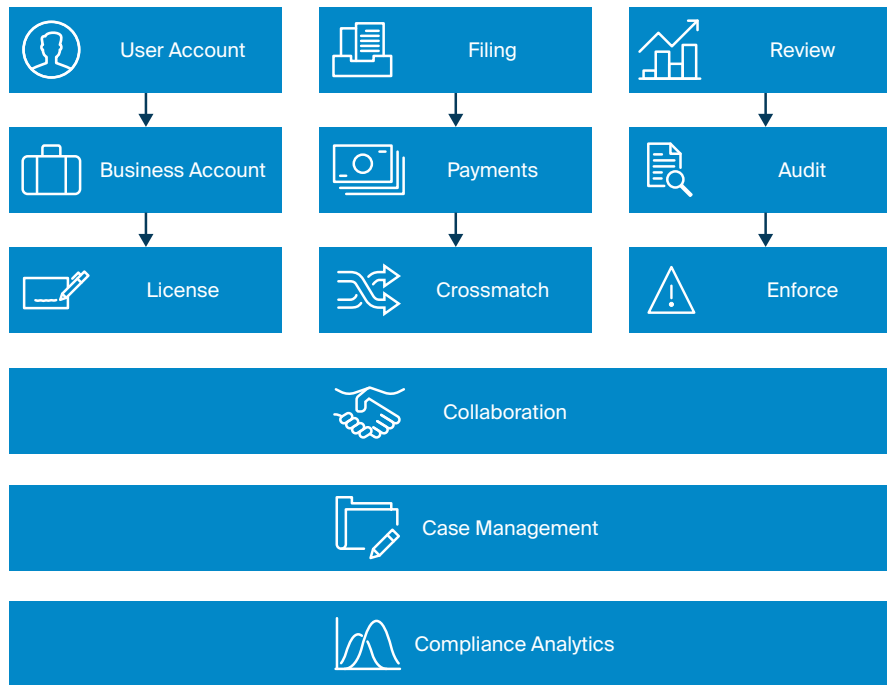

Flexible

- ✓ Adapts in real time to changes in enforcement requirements
- ✓ Supports modeling of possible rule changes
- ✓ Simple and fast for states to configure

The Meyercord Tax Revenue Compliance Management System

Supporting licensing, e-filing, tax examiners and auditors

Our customers gain efficiencies – saving time, resources and costs for the states.

Solutions include secure marking and product tracking

Analytics and reports support the state's burden to prove "diligent enforcement"
